

## **FANS Interoperability Team Meeting (FIT/19)**

**Nadi, Fiji, 28-29 February 2012**

---

### **Agenda Item 6 – Problem Reports**

#### **Problem Report Briefing**

**Presented by the FIT Central Reporting Agency**

#### **SUMMARY**

This paper and its annex provide a discussion of the PRs received by the CRA since FIT 18. The FIT members are invited to review and comment on this information.

### **1. INTRODUCTION**

- 1.1 The CRA has received 196 PRs logged via the FIT CRA website since ISPACG FIT 18. 55 of these occurred in the South Pacific.

### **2. DISCUSSION**

- 2.1 The CRA received problem reports from the following regions:

Bay of Bengal  
Indian Ocean  
North Atlantic  
North Pacific  
South Atlantic  
South Pacific

- 2.2 More than half of these (105) were reported from the NAT.
- 2.3 Several of the PRs were not for FANS problems (e.g., DCL, ATIS). Rather than attempting to clarify which types of PRs should and should not be reported via the website, the CRA agreed to accept all and then direct the non-FANS PRs to the responsible agencies.
- 2.4 We received 6 PRs that occurred in the South Atlantic, which does not have a DLMA. Those PRs have been passed to the ATSU contacts of record.
- 2.5 Refer to Annex 1 for PR details.

**3. ACTION BY THE MEETING**

- 3.1 The meeting is invited to review the attachment and comment.
