OneSKY Briefing

One Team ▶ One System ▶ One Sky

Why are we doing this?

- Meet customer, stakeholder and owner expectations
- Address limitations of existing system
- Manage future growth and complexity
- Improve service provision

Key capability improvements

Improving our safety through...

- One national system
- One Australian FIR
- Business continuity and contingency responses
- ATC workload management
- Customer benefits
- Modular and open architecture
- Modern design standards
- Globally-aligned development path

Primary goals

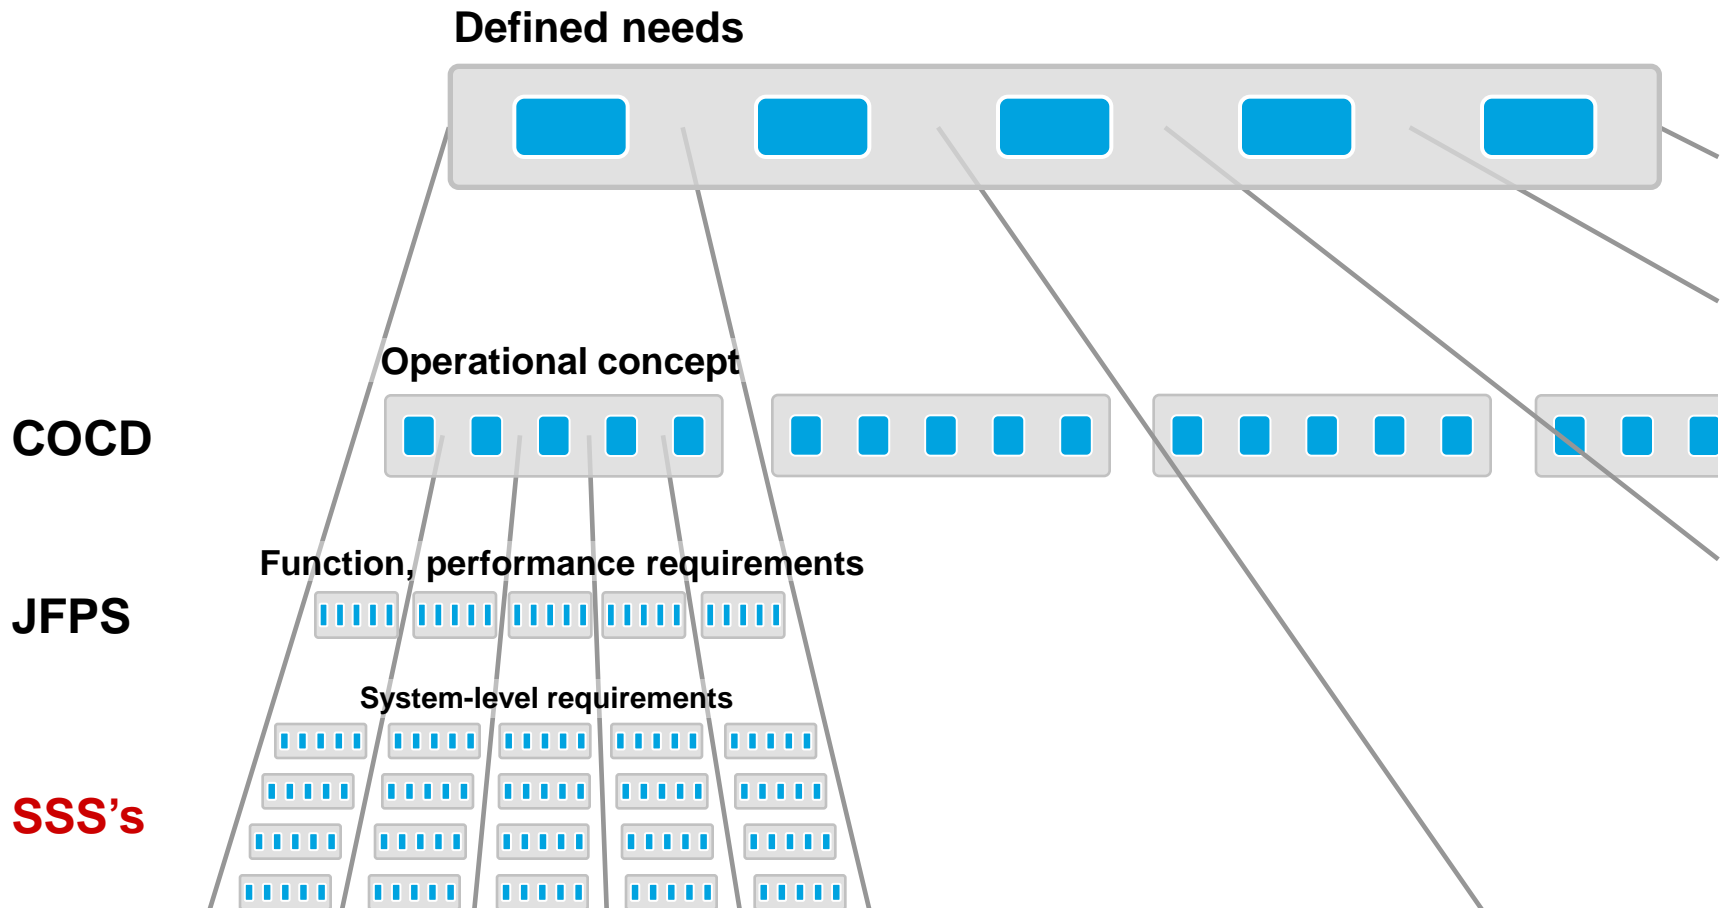

Provide...

- a reliable ATM system
- an adaptable ATM system
- a national ATM system
- appropriate maintenance to the ATM system
- appropriate support to the ATM system

Enable Airservices Australia and Defence to...

- Deliver safe air traffic services
- Deliver efficient air traffic services
- Manage growth of air traffic
- Support national security

JFPS requirements capturing and traceability process

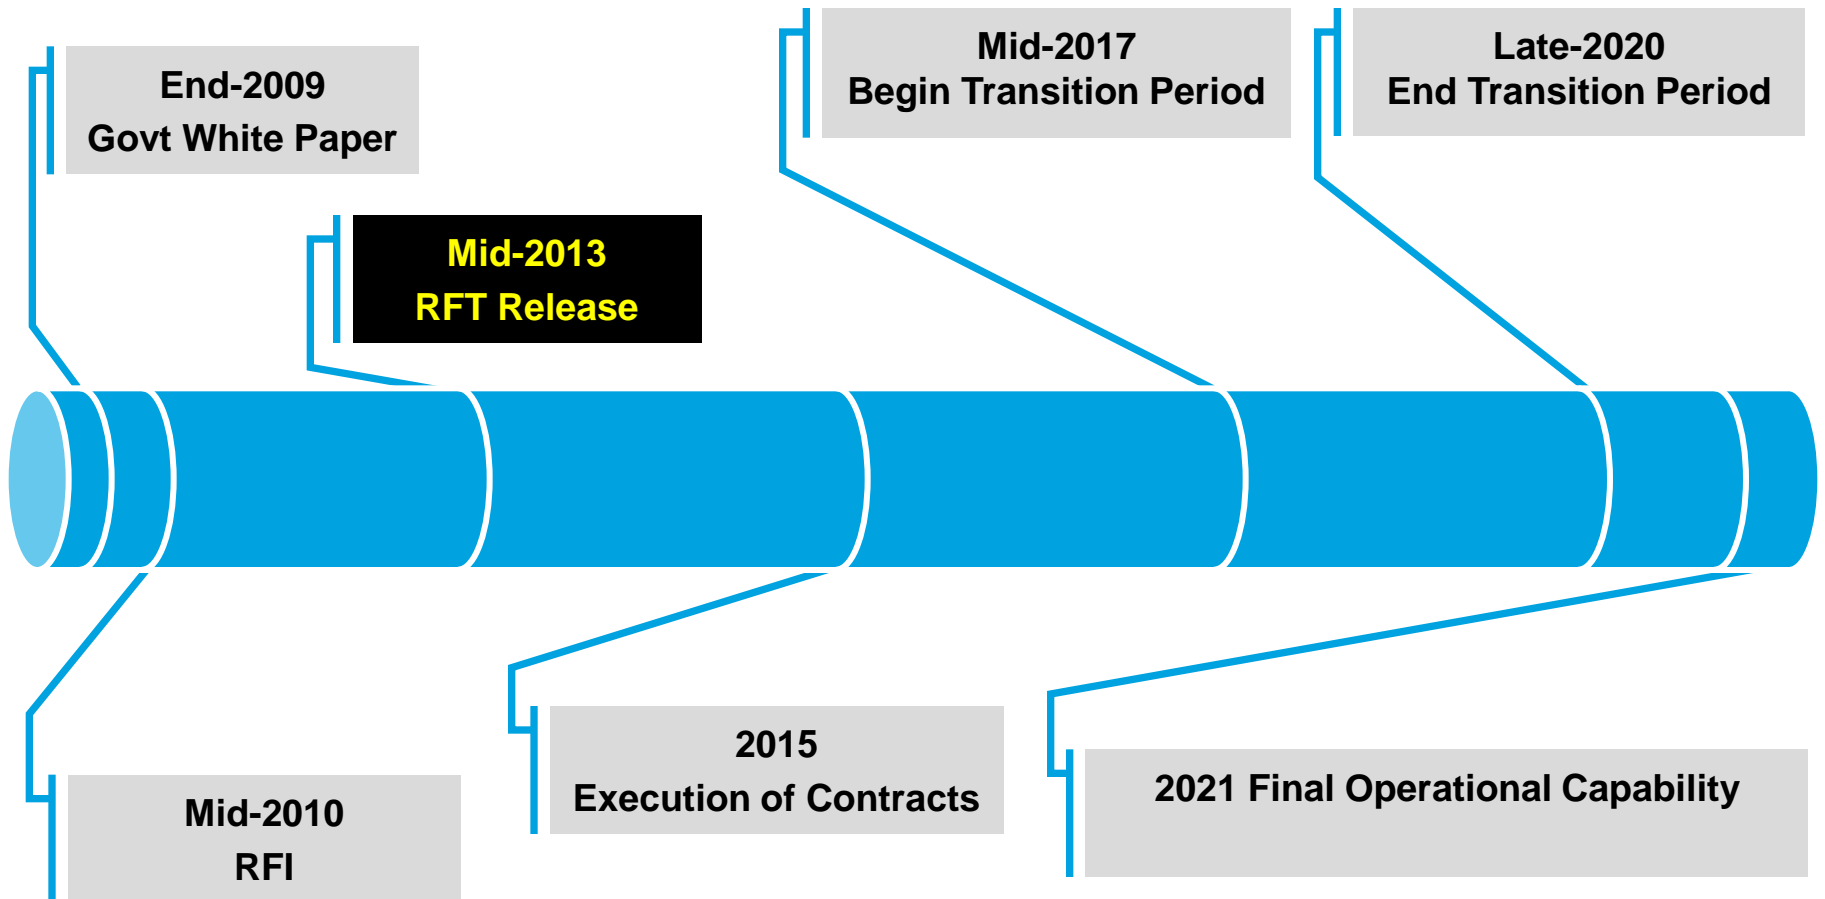

Future schedule and milestones

- Providing increased visibility and transparency in our plans
- Improved understanding of respondents' resource implications
- Subject to change – but certainly our aim!
