Current South Pacific Operations

International Fleet

- **Boeing 777-300**
Total Aircraft – 20

- **Boeing 777-200**
Total Aircraft – 47

- **Airbus A321Neo**
Total Aircraft – 70

- **Boeing 787-8**
Total Aircraft – 34

- **Boeing 787-9**
Total Aircraft – 22

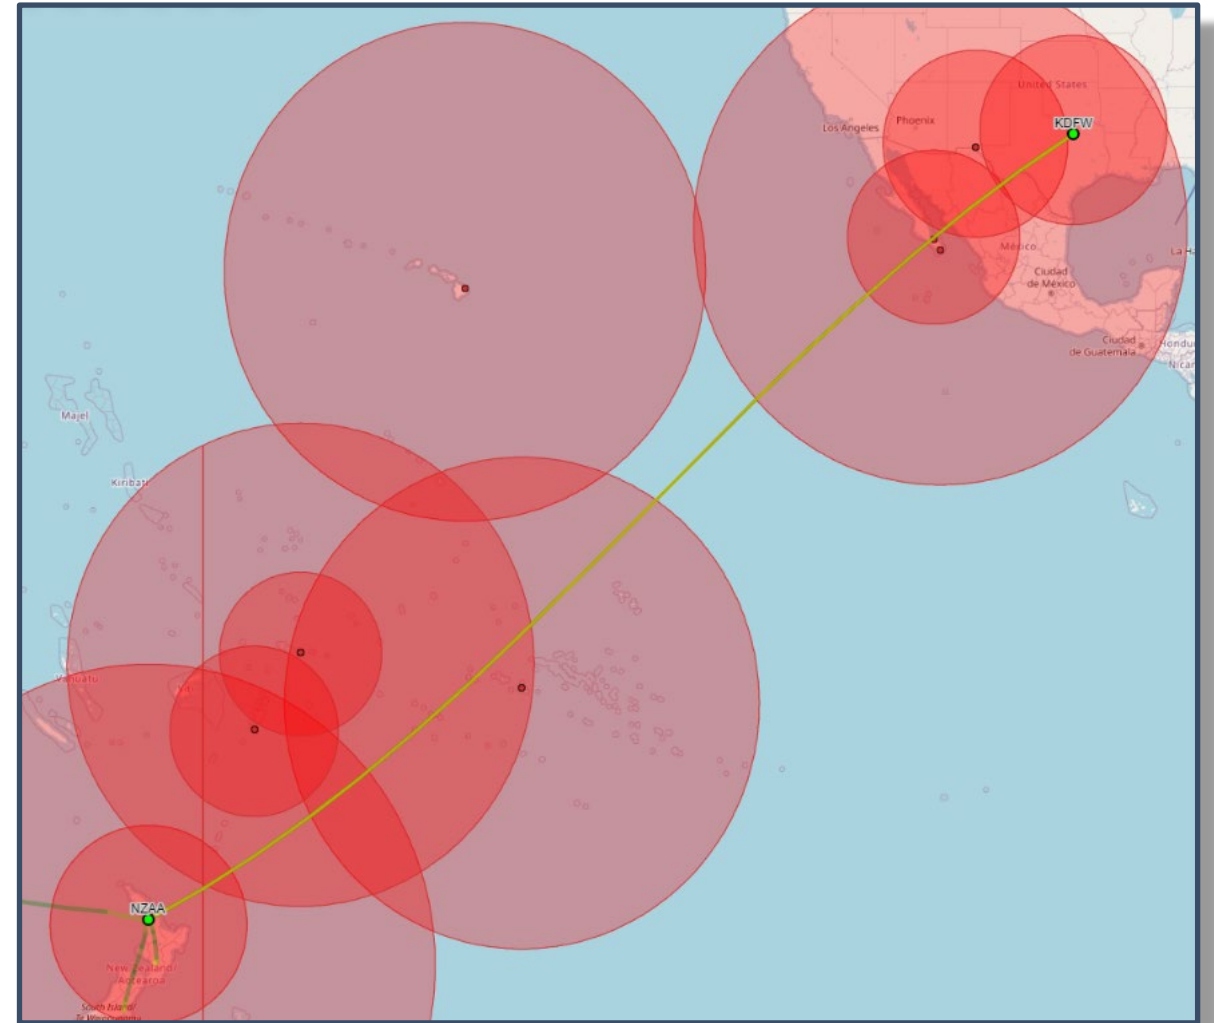

ETOPS

Very often, the most efficient route between DFW and AKL is beyond 180-Minute ETOPS

American Airlines is in the process of applying for **240-Minute ETOPS** authorization to support this route

The goal is to have authorization in time for the seasonal restart in late October

New Flight Planning System

- Phased implementation by geographic region
- Fully implemented for North Atlantic / Europe
- Dispatcher training and live flight testing in the Asia/Pacific region to begin this month
- Implementation to follow during the Summer (Northern Hemisphere)

New Flight Planning System

- More dynamic routings including...
 - UPRs
 - DARP
- Supports ETOPS beyond 180-Minutes
- There will be growing pains!
- We will keep ANSPs 'in the loop'
- Please let us know of any problems
 - Routings
 - FPLs
 - Other

Thank You!
