

# CHILE UPDATES

## ISPACG/38

### **Current status:**

- The TOPSKY system from THALES LAS France data link and AIDC capabilities under the ICD 3.0 ASIA PAC standard has been implemented, ATS Units in Chile are using AIDC in a Pre-Operational phase.
- AIDC tests have been performed with Lima Control Center and it will continue during the first half of this year.
- Next step is to update the coordination mode with Auckland and Tahiti ACC using AIDC in a pre-operational phase to finally link Santiago Oceanic ACC via AIDC with ASIA PAC ACCs.
